

CALL TO PRAYER

JULY 2026

EVANGELISM AND VOCATIONAL MINISTRY

I recently asked for prayer as I began discipling two students at the ministry training center known as “Antioch,” and I have been encouraged to see God answer those prayers in an exciting way!

The two young women I meet with each week have been participating in an evangelism explosion course. Through this program, students go into the community each week to share the gospel and have conversations about Jesus. Both girls were nervous when they first started, but over time, I have watched God give them more confidence. A few weeks ago, one of them shared that she and her team had been meeting with a man in the community over several weeks. After many conversations about Jesus, he told them he was ready to put his faith in Christ. They had the privilege of praying over him as he accepted Jesus as his Savior. What a joy it was to hear that story over breakfast one morning! Please pray for this new believer as he begins following Christ and for the students as they continue meeting with him and encouraging him in his faith.

I also recently visited Hebron Medical Center, a Christian hospital in Phnom Penh, that combines health care, nursing education, and gospel ministry. The hospital partners with nursing students

and seeks to demonstrate Christ’s love through both patient care and education.

As a nurse, I was encouraged to see another ministry in Cambodia investing in future health-care professionals while sharing the gospel. Since my long-term goal is to help develop nursing education through simulation training, it was exciting to see another organization using nursing education as a ministry tool. Seeing their work reminded me of the impact that Christ-centered health-care education can have on students and the communities they serve. I hope to return soon to learn more about their ministry and spend additional time observing their nursing education program.

Praise God for:

- The man who came to Christ through evangelism ministry.
- The growing relationships with the women I disciple.
- Better sleep and rest.

Please pray for:

- Wisdom and direction for the Bible college students.
- Continued progress in Khmer language learning.
- Discipleship for the new believer.
- Wisdom for how I balance language study, ministry, and rest.

PROVISIONS AMID UNCERTAINTIES

Regional tensions have been on the rise in our area of the world. Because of this, our team had to evacuate to a different nearby country. For three weeks, we waited to see if it would be possible to safely return home. A lot of prayer happened on the floors of hotel rooms. But while there was much uncertainty, we also saw God's hand in every decision, warning, and every moment of protection.

Our regional leadership team ended up issuing a two-month strategic withdrawal for both of our teams and recommended returning to the United States. Our family will be living in the States for the next year since our home assignment was already scheduled for the beginning of the summer.

Though our sudden departure from our country holds much disappointment and loss, we thank the Lord for His provision and are trusting that He will make a way for both of our teams to return to the field soon. We were encouraged to hear that our church there has continued to meet, and their resilience encourages us!

Serving alongside the believers there to reach their people and fulfill the Great Commission is an honor. Thank you for getting on your knees and praying for missionaries by name, giving sacrificially to missions, and being a part of sending those who, in partnership with you, take the good news to those who have not yet heard!

MEDICAL PROVISIONS

Hope Medical Center is a 50-bed hospital in subtropical West Africa that exists to express God's love through verbal proclamation and lifestyle evangelism and to provide competent and compassionate medical care and community development. As our hospital continues to grow, we have been speaking with various medical professionals interested in cross-cultural work. It has been difficult to recruit workers for various reasons. But despite many having a list of reasons not to, there are fortunately those who are still willing to come. We currently have two visiting doctors who have worked in West Africa and speak French. Despite some obstacles in getting here, they persevered. They have been a great help at the hospital, and the staff have enjoyed interacting with them.

We are praising God for the visiting doctors who have been able to help at the hospital!

Please pray:

- For each of us to learn to see things from God's perspective.
- For the continued spiritual growth of our hospital staff.
